

Research August 2019 in
Schifferstadt
for
Johann Sebastian Sturm, born 1610

What did we know?

Johann Sebastian Sturm was born in 1610 in Schifferstadt, Rhineland-Palatinate, Germany. He married Maria Barbara Gloss in 1629. They had five children in 32 years. Johann Sebastian died in Steinen, Baden Württemberg in 1692.

What did we find?

Relatives! Far back related, but descendants from the same family.

We met them at the local museum. It was an exciting and beautiful day, folkloristic street festival in Schifferstadt on the day of our visit, many people wearing historical costumes.

After sharing all available information at the museum the client and the ggg-cousins enjoyed having a glass of apple cidre together.

What had impressed us most?

We can only prepare our tours to a certain extend. But often enough we are surprised that circumstances of our visits are far more than we expect. It was a party for Jane as the whole town was celebrating the folkloristic street festival.
